Monumental Entryways into the Nation's Capital and The George Washington Bicentennial Celebration (1932)

An Act of Congress, approved December 1924, created The George Washington Bicentennial Commission to study and recommend a "proper" celebration in 1932 of the 200th anniversary of the birth of George Washington. The Commission's purpose was to commemorate "*the first true American*" so that "*future generations of American citizens may live according to the example and precepts of his exalted life and character and thus perpetuate the American Republic.*" As part of this Act, each state was encouraged to appoint state commissions and committees to formulate programs for such a celebration in conjunction with the federal Commission. In addition, the Commission invited the public to send recommendations for this celebration. Special events were to be celebrated across the nation, with particular emphasis on places that George Washington frequented. In the nation's capital, a series of major and collateral events were planned for the 1932 celebration, including, among others, the formal opening of the Mount Vernon Memorial Boulevard (Virginia leg of the George Washington Memorial Parkway); completion and opening of the Arlington Memorial Bridge; and construction of the U.S. Supreme Court building. The anniversary events were to take place between February 22 (George Washington's birthday) and November 24 (Thanksgiving Day).

Coincidental to preparations for the George Washington Bicentennial celebration, and as part of the massive public building program then underway, President Herbert Hoover sought special appropriations for "imposing entrances" into "what is destined to be the most lavishly developed capital in the world," as noted in the *Evening Star*.¹ The National Capital Park and Planning Commission (NCPC) began studying ideas for treatment of the various approaches to the city. In particular, in 1929, the NCPC was developing plans for an appropriate approach into the city from Virginia at Key Bridge, a monumental north entrance portal into the city at 16th Street, and lesser portals at various other entry points into the city from Virginia and Maryland.²

In 1930, the Garden Club of America (GCA) proposed to sponsor the marking of entrances into the nation's capital, with the idea that the project be carried out in time for the George Washington Bicentennial in 1932. As initially conceived by the National Capital Committee of the Garden Club of America under the chairmanship of Mrs. Frank B. Noyes, the GCA would develop and carry out a

¹ "Capital Gateway Plans Considered by Commission," *The Evening Star*, 1929.

² In 1929, plans for a monumental portal at 16th Street and the District line were approved by NCPC, while Wisconsin Avenue at Western was also being considered. See "District Portal Plans Approved: 16th Street Parkway Approach is O.K.'d by Planning Commission," *The Evening Star*, June 22, 1929; "Proposed Capital North Portal is Before Planners," *The Evening Star*, July 26, 1929; and "Wisconsin Avenue Entrance to City to be Considered," *The Evening Star*, October 19, 1929, p.12.

planting scheme at certain identified approaches into the city. In October 1930, the GCA furthered the notion of marking the entry points into the city not only by landscaping elements, but by placing “two shafts or columns surmounted by eagles” at the identified entries.³ As noted in a letter from Mrs. William Lockwood, the President of the Garden Club of America, “It is believed that attractive entrances into Washington will not only add to our pride in our Capital, but may also be an inspiration to other cities to increase the beauty of their entering highways.” The NCPC endorsed the notion of using columns to mark the approaches to the city and thus began working with the Garden Club of America on developing a design for entry markers.

Proposed Entry Pylons

In January 1931, the NCPC presented to the Commission of Fine Arts a suggestion for the Garden Club entrances into the city. At this meeting, NCPC suggested re-using 16-foot columns that were being removed from the State, War and Navy building (the old Executive Office Building, now the Eisenhower Executive Office Building) and enhancing them with eagles on top. The Commission of Fine Arts examined the proposed design and unanimously rejected it as “being out of scale and inappropriate as a marker.”⁴ Mr. Moore, Chairman of the Fine Arts Commission noted that “the Garden Club of America would do much better to develop a planting scheme that could be carried out at the various entrances to the District of Columbia...allowing space for some architectural motif appropriately designed that could be erected there later.”⁵

In a letter addressed to Col. Grant of the National Capital Park and Planning Commission, CFA Chairman Charles Moore noted that the discarded columns from the State, War and Navy building are “in themselves bad in design and not of the right scale to serve the intended purpose.”⁶ His letter strongly suggested that in view of the limited budget,⁷ the funds should be expended strictly on planting schemes, which “ultimately would serve surroundings of appropriately designed and executed markers.” However, in his letter, Moore also acknowledges that the granite pylons at the Virginia end of the Arlington Memorial Bridge (with eagles atop) could be used, in terms of material and workmanship, as an appropriate model for entrance

pylons.

Despite the CFA's effort to encourage planting-only schemes, the NCPC continued to pursue the idea of monumental entry pylons, seizing upon Moore's reference to the Memorial Bridge pylons. In February 1931, NCPC presented drawings to the CFA showing a proposed pylon design, modeled after the Memorial Bridge ones. As drawn, the pylons measured 14 ½ feet in height, with the eagles on top rising an additional 2' 4".⁸ The NCPC proposed 8 pairs of pylons—"two at each of the eight important entrances to the District of Columbia." An article on the proposed pylons and an accompanying sketch appeared in the *Evening Star* newspaper (*Figure 1*).⁹ At the February 1931 Commission of Fine Arts meeting, NCPC noted that the Garden Club planned to erect temporary pylons out of concrete to be ready for the George Washington celebration.¹⁰ The Commission approved the pylon design, but urged NCPC and GCA to make the pylons in permanent form, recommending white cement mixed with white marble aggregate. The Commission further suggested that marble tips might be used in place of eagles.¹¹

Approved Entry Markers

Despite CFA's approval for the entry pylons, development of that particular design scheme appears to have been abandoned in the months following the February meeting. By April 1931, the pylon idea was replaced with a much more modest proposal that included smaller stone markers within a planted bed. The design of these markers, later delineated by architect Edward Donn, was based upon those of the Mason-Dixon Line and the Boundary stones of the District of Columbia.¹² The markers were to be made of Aquia Creek sandstone and were to be adorned

⁸ Minutes from the Commission of Fine Arts, February 12, 1931.

⁹ "D.C. Memorial and Entry Pylons Will be Hastened: Garden Club Meeting Discusses new Markers," *The Evening Star*, n.d. and "Favor 2-Column Portals Design," *The Evening Star*, December 19, 1930. The latter article notes that the Commission was considering markers at the following five locations: Bladensburg Road, Georgia Avenue, Piney Branch Road, the Highway Bridge and Chain Bridge. Of these identified sites, only the Georgia Avenue site is known to have ultimately received a marker.

¹⁰ The Commission of Fine Arts minutes of February 12, 1931 note that an estimate for constructing the temporary pylons had been secured from Mr. Earley for \$275 each.

¹¹ CFA Minutes, February 12, 1931.

¹² The April 15 minutes of the Commission of Fine Arts indicate that it was the CFA that suggested the Mason-Dixon Line markers as a model for the entry markers. In particular the minutes state, "...the Garden Club of America had decided to accede to the suggestion of the Commission that marking of the entrances to the District of Columbia be mainly planting a marker of Aquia sandstone, like the markers used for the first survey of the Mason Dixon Line. In an April 25, 1931 letter

with the Maryland Coat of Arms, or the Virginia seal on one side and the seal of the District of Columbia on the other.¹³ In order to negate any future boundary dispute such stones might incur, the CFA proposed that one side of the marker be inscribed with "Presented by the Garden Club of America." The NCPC heartily supported the new design proposal. In a letter to Charles Moore at CFA, Colonel Grant writes, "I am very glad to note that the Fine Arts Commission approves a design similar to the Boundary stones of the District of Columbia as it seems to me that the use of the design of markers approved by President Washington and used on the original District Line is unusually appropriate for anything done in and about the District in 1932."

After conducting a site visit of both the 16th Street and Wisconsin Avenue entrances to the District, the Commission of Fine Arts recommended that a locational plan be developed for the markers and their individual sites, in connection with a "suitable planting scheme." A May 1931 letter from Charles Moore notes that based upon bids received by the architect, Edward Donn, the markers could be delivered to the Garden Club, set in place, and carved with the coats of arms for \$500 per pair. In December 1931, following final approvals by NCPC, the Garden Club noted in its minutes that it would erect eight markers, including two at the "Highway Bridge, Mount Vernon;" two at Key Bridge; two at 16th Street and two at Chevy Chase Circle for a cost of \$3,900.00. The Club confirmed that each marker would bear the inscription "Erected by the Garden Club of America 1932" near the base of the markers on the side facing the road.¹⁴

Construction of the Entry Markers

The first pair of entry markers was erected on April 24, 1932 on the Virginia side of Key Bridge. Although erected within the established time-frame allotted for the George Washington Bicentennial celebration events of 1932 as initially intended by the Garden Club of America, no mention of the celebration or any association with it appears in the local press covering the dedication of the markers. The *Evening Star* printed a photograph of one of the entry markers on the Virginia side of Key Bridge with a caption noting that the marker is "one of the new

from Col. Grant from NCPC to Charles Moore at CFA, Grant notes, "I am very glad to note that the Fine Arts Commission approves a design similar to the Boundary stones of the District of Columbia as it seems to me that the use of the design of markers approved by President Washington and used on the original District Line is unusually appropriate for anything done in and about the District in 1932."

¹⁴ Research report on GCA Markers, titled "Relevant Excerpts from Executive Committee Meeting Minutes and Board of Directors Meeting Minutes," 1/20/1931 through 4/13/1977, conducted for Alicia Ravel for her research on the Chevy Chase Circle markers (from the personal files of Alicia Ravel).

- (e) National Historic Landmark.

201 CRITERIA FOR DESIGNATION IN THE D.C. INVENTORY

- 201.1 Historic and prehistoric buildings, building interiors, structures, monuments, works of art or other similar objects, areas, places, sites, neighborhoods, and cultural landscapes are eligible for designation as historic landmarks or historic districts if they possess one or more of the following values or qualities:
- (a) *Events*: They are the site of events that contributed significantly to the heritage, culture or development of the District of Columbia or the nation;
 - (b) *History*: They are associated with historical periods, social movements, groups, institutions, achievements, or patterns of growth and change that contributed significantly to the heritage, culture or development of the District of Columbia or the nation;
 - (c) *Individuals*: They are associated with the lives of persons significant to the history of the District of Columbia or the nation;
 - (d) *Architecture and Urbanism*: They embody the distinguishing characteristics of architectural styles, building types, or methods of construction, or are expressions of landscape architecture, engineering, or urban planning, siting, or design significant to the appearance and development of the District of Columbia or the nation;
 - (e) *Artistry*: They possess high artistic or aesthetic values that contribute significantly to the heritage and appearance of the District of Columbia or the nation;
 - (f) *Creative Masters*: They have been identified as notable works of craftsmen, artists, sculptors, architects, landscape architects, urban planners, engineers, builders, or developers whose works have influenced the evolution of their fields of endeavor, or are significant to the development of the District of Columbia or the nation; or
 - (g) *Archaeology*: They have yielded or may be likely to yield information significant to an understanding of historic or prehistoric events, cultures, and standards of living, building, and design.
- 201.2 To qualify for designation, they shall also possess sufficient integrity to convey, represent or contain the values and qualities for which they are judged significant.
- 201.3 To qualify for designation, sufficient time shall have passed since they achieved significance or were constructed to permit professional evaluation of them in their historical context.

Section Number E **Page** 6

sandstone markers which are being erected at entrances to the District of Columbia by the Garden Club of America.” The caption does not identify the other sites.¹⁵

Over a year later, in October 1933, another pair of entry markers was dedicated at Chevy Chase Circle, along with the Newlands Memorial Fountain. According to the *Evening Star*, the Chevy Chase markers were the “sixth to be placed by the Garden Club of America at important gateways to the city.” The article notes that the other ~~four~~^{five} pairs of markers were placed at the 16th Street entrance, at Wisconsin Avenue, at Georgia and Alaska avenues, and on the Virginia side of “both the Highway and Key Bridges.” The article also states, “It is hoped that the Garden Club of America will similarly mark other entrances to the city as they are developed into impressive gateways.”¹⁶

Of the locations identified in the article, pairs of markers still exist at Chevy Chase Circle and Wisconsin Avenue (at Western Avenue), while a single marker stands at the confluence of Georgia and Alaska Avenues. No markers are presently located at the 16th Street portal, and it is not believed that any markers were ever erected at that site.¹⁷ Neither one of the original pair of markers still stands on the Virginia side of Key Bridge.¹⁸ Finally, two markers not mentioned in the article, but which were erected between 1933 and 1935¹⁹, survive *in situ* at Westmoreland Circle.²⁰ While the Garden Club of America donated the markers themselves, the Virginia and Maryland Garden clubs, respectively, donated the plantings around the markers, and the American Automobile Association contributed small posts and chains encircling the markers.²¹

Despite the Garden Club’s intention to sponsor the entry markers as part of the George

¹⁵ Between this April 1932 article and the 1933 dedication of the Chevy Chase Circle markers, no other newspaper articles could be found celebrating the erection of the other sets of entry markers.

¹⁶ “Notables Attend Francis Newlands Fount Dedication,” *The Evening Star*, October 13, 1933, B-1.

¹⁷ In the “Report of the Commission of Fine Arts, July 1, 1929 to December 31, 1935” the report notes that no markers were erected at 16th Street, “Congress having named the Sixteenth Street entrance Montgomery Blair Portal, a suitable gateway awaits further action as to both design and funds for building.”

¹⁸ It is not clear if markers were ever erected at 16th Street or not. And, based upon the location of the marker on center of Georgia Avenue at Kalmia Road and Alaska Avenue, it appears that it was originally erected as a single marker, rather than as one of a pair of markers.

¹⁹ The Westmoreland Circle itself was opened in November 1932. The markers are known to have been erected by 1935 when a letter was written to the CFA regarding their siting on the Circle.

²⁰ “Opening of Circle Gateway to Hills,” *The Washington Post*, November 20, 1932, R2.

²¹ “Fund to Aid Clubs Beautify Portals Pledged by A.A.A.,” *The Evening Star*, May 4, 1927. Only two of the surviving markers—one at Westmoreland Circle and the one on Georgia Avenue at Kalmia and Alaska retain the chain fences.

Washington Bicentennial celebration, the project evolved into a smaller-scale and longer-term one that extended beyond the confines of the February to November 1932 celebration. None of the press covering the marker dedications mentions any association with the 200th anniversary celebration and none of the reports reflecting on the events surrounding the celebration mentions the efforts of the Garden Club to beautify the city's entryways. Even the Garden Club of America in a 1942 report on its achievements, fails to mention the intended purpose of the markers. The report simply notes that markers "mark the entrances to Washington."²²

Siting of Markers

The markers were always intended as ceremonial entry markers simply identifying the approaches into the city from Virginia and Maryland and not as official boundary markers. As noted above, the CFA, in its review of the markers, expressed some concerns over boundary disputes. This concern led the CFA to recommend that the GCA place an inscription on the markers, thus identifying them as memorial markers. A 1935 letter to Charles Moore from a Westmoreland Hills resident questioning the location of the stones validates the CFA's boundary dispute concern. The letter reads:

"I notice the nice Boundary stones which have been put on the circle of Massachusetts Avenue Extended. I like them very much, but if you will notice some time, you will see, I think, that they have not been rightly oriented. The Maryland District Line neither goes through the plane of either their surfaces, or through the corners. I think when you or your representative sees them you will see that they need turning so as to mark the boundary properly."

A return letter from Moore to the concerned citizen explains that the Westmoreland Circle markers, like those at Chevy Chase Circle, were not meant to mark the actual boundary line, but were simply a notification that one was passing a boundary.

Planting Elements

The Garden Club of America initially conceived of beautifying the city's entryways by planting certain approaches into the city. However, as the project focus turned to stone markers, the

²² "Draft of Report re: Arboretum and Other DC Gardens/Parks written by Peggy Nalls' great-aunt Martha (Mrs. T. H. B.) McKnight for Mrs. Gilbert Hitchcock, Incoming Chair of GCA National Capital Committee," 1942, (copy from the files of Alicia Ravenal and Friends of Chevy Chase Circle).

planting scheme became a secondary element. A description of the Key Bridge marker in the *Evening Star* states that “a planting of shrubs and ivy ground cover ... will be protected by a temporary wire cover until it is well started” and press coverage of the dedication of the Chevy Chase markers similarly notes that the markers “are surrounded by plantings and shrubbery.” The fragility of even these simple plantings was of immediate concern to those in charge. A letter dated May 31, 1933 from Col. Grant to Mr. Charles Moore provides fair warning:

“...you are advised that the ivy planting will be completed and will be cared for to the best of our ability. These plots, however, are so located that it may be difficult to keep them looking well. They are especially exposed to the sun and further, as you no doubt know, there is no water available in the immediate vicinity for sprinkling. However, an effort will be made to keep them going.”

Another letter two years later from Charles Moore to Colonel Grant illustrates that the maintenance problem of the plantings persisted. In this letter, Moore notes that since the markers at the Virginia end of the “Highway Bridge” are located in “no man’s land” and are thus not being cared for, that the “ladies do not wish to order the replanting of them until they could be assured that care will be given to them.”

In addition to the plantings, the entry markers themselves soon became susceptible. A 1941 note in the Garden Club Minutes documents that “crown stones at entrance to District of Columbia” have been lost because of road widening. A 1977 entry indicates that the stone markers had all but been forgotten by the GCA when the two Wisconsin Avenue stones were “discovered” by contractors working on METRO construction at Friendship Heights.²³

Today, seven GCA markers remain in various states of preservation at four different entry points into the city (two at Westmoreland Circle, two at Friendship Heights at Wisconsin and Western Avenues; two at Chevy Chase Circle; and one on Georgia Avenue at Alaska and Kalmia). Of these seven markers, only the pair at Chevy Chase Circle and the one on Georgia Avenue are

²³ The minutes state that the contractor “has come upon stone markers” and is “holding the markers subject to the GCA decision regarding disposition.” Although the GCA suggested donating the markers to the National Arboretum, they were obviously re-installed, because the markers still stand today.

Garden Club of America Markers in Washington, D.C.

Section Number F

Page 10

F. ASSOCIATED PROPERTY TYPES

Name of Property Type: Stone Markers

Description:

The Garden Club Entry Markers are upright, rectangular-shaped, dolmen-like stones constructed of Aquia Creek sandstone. Although the stones originally rose approximately five feet in height, they are now of varying heights depending on whether and how many times they have been knocked over and broken by erratic motorists and re-erected on their broken bases. The markers feature fluted shafts with fluting on-center running vertically the full length of the shaft, and horizontally along the edges, forming a defined edge or border.

On the markers located at the Maryland-District line, the seal of Maryland (the shield of the Calvert Coat of Arms) is located on one side towards the upper part of the stone shaft, with "Maryland" incised in uppercase lettering below the seal. On the opposing side and also at the upper part of the shaft, is a cartouche carving representing the District of Columbia and the commemoration of George Washington. "District of Columbia" is incised in uppercase lettering below the cartouche. The District of Columbia cartouche features a bas-relief depicting George Washington standing upon a pedestal with Lady Justice on the ground next to the pedestal holding a laurel wreath at its front. George Washington is flanked in the background by the dome of the Capitol building and a rising sun. In the foreground, an eagle is perched upon a garland emanating from a central laurel wreath.

An inscribed dedication "Erected by the Garden Club of America 1932" was meant to appear on one of the undecorated sides at the lower part of the marker; however, only one of the markers—the one located on the east side of Wisconsin Avenue at Friendship Heights—still has its dedication visible (some may not have been inscribed, others may be below ground level, others may have broken off). Similarly, a metal fence comprised of four metal bollards with chains linked between them, originally surrounded the markers. Today, only two of the markers retain these chain fences. Finally, the markers were originally set within planting schemes designed by the Maryland and Virginia Garden Clubs, respectively. Today, only the markers on Georgia Avenue and Chevy Chase Circle are set within (recently) planted beds.

Significance:

The Garden Club of America markers are stone markers that were erected to mark important entrances to the District of Columbia from Maryland and Virginia in 1932 and 1933. Originally planned to be dedicated as part of the 1932 George Washington Bicentennial celebration, the markers were constructed both concurrently with the series of events celebrating the 200th anniversary of Washington's birth and following the celebration. The markers were designed by local Washington, D.C. architect Edward Donn for the Garden Club of America which sponsored their erection in collaboration with the National Capital Parks and Planning Commission and under the review of the Commission of Fine Arts. Of the original six pairs of markers identified as having been constructed, three pairs and one individual marker survive in various degrees of preservation.

The markers are significant both as surviving commemorative objects associated with the important George Washington Bicentennial Celebration, a national celebration commemorating the contributions made by the "first true American," and as landscape objects marking the District-Maryland and District-Virginia line at notable entry points into the city. The ornamentation of the stone markers (i.e the depiction of George Washington) is emblematic of the efforts of the era to arouse nationalistic sympathies and, as such, provides an excellent artistic expression of the time.

The markers are significant under Criterion Consideration F with Art and Landscape Architecture as the Areas of Significance. The Period of Significance for the markers extends from 1932 to 1933, when the first and last of the markers are known to have been dedicated.

Registration Requirements:

Because many of the Garden Club Markers have been knocked over by motorists and remounted in slightly different locations from the original locations, it is not necessary that the markers be *in situ* in order to retain integrity.

H. Summary of Identification and Evaluation Methods

The Multiple Property Listing of Garden Club of America Markers in Washington, D.C. is based upon archival research on the George Washington Bicentennial Celebration in D.C. and the role of the Garden Club of America and its local affiliates in contributing to that celebration through the erection of stone entry markers into the city. The D.C. Historic Preservation Office conducted the research in the summer/fall of 2006. Based upon the research, the original marked entryways were identified and an on-site investigation of those entryways took place. The surviving markers were then surveyed and photographs were taken. The Multiple Property Document and four individual nominations for the extant markers were then prepared (three pairs of markers, one single marker).

Registration Form**

This form is for use in nominating or requesting determinations for individual properties and districts. See instructions in *How to Complete the National Register of Historic Places Registration Form* (National Register Bulletin 16A). Complete each item by marking "x" in the appropriate box or by entering the information requested. If any item does not apply to the property being documented, enter "N/A" for "not applicable." For functions, architectural classification, materials, and areas of significance, enter only categories and subcategories from the instructions. Place additional entries and narrative items on continuation sheets (NPS Form 10-900a). Use a typewriter, word processor, or computer, to complete all items.

Section 7 Page 1

Description Summary:

Between April 1932 and October 1933, pairs of stone markers, designed by architect Edward Donn to identify important entrances into the District of Columbia from Maryland and Virginia, were erected at six different locations into the city. The pair of stone markers at Westmoreland Circle represents two of seven surviving markers (three pairs and one single marker). The surviving pairs of markers are located at Westmoreland Circle; at Friendship Heights, on either side of Wisconsin Avenue at Western Avenue; and at Chevy Chase Circle. The isolated example is found in the median at the center of Georgia Avenue at the District line at Kalmia Road and Alaska Avenue. All of the extant markers have signs of weathering, pollution and other abuse. Most, if not all, have been knocked over at some point by motorists, or removed entirely and re-erected in the same general, but not exact same locations. The missing markers were likely removed and discarded during road widenings and/or construction; however, nothing is known for sure of their fate.

General Description:

The markers are upright, rectangular-shaped, dolmen-like stones constructed of Aquia Creek sandstone. Although the stones originally rose approximately five feet in height, they are now of varying heights depending on whether and how many times they have been knocked over and broken by erratic motorists and re-erected on their broken bases. The markers feature fluted shafts with fluting on-center running vertically the full length of the shaft, and horizontally along the edges, forming a defined edge or border.

On the markers located at the Maryland-District line, the seal of Maryland (the shield of the Calvert Coat of Arms) is located on one side towards the upper part of the stone shaft, with "Maryland" incised in uppercase lettering below the seal. On the opposing side and also at the upper part of the shaft, is a cartouche carving representing the District of Columbia and the commemoration of George Washington. "District of Columbia" is incised in uppercase lettering below the cartouche. The District of Columbia cartouche features a bas-relief depicting George Washington standing upon a pedestal with Lady Justice on the ground next to the pedestal holding a laurel wreath at its front. George Washington is flanked in the background by the dome of the Capitol building and a rising sun. In the foreground, an eagle is perched upon a garland emanating from a central laurel wreath.

The sole surviving Virginia marker bears a seal of Virginia on one side and the commemorative seal of Washington on the other side.

County and State

Section 7 Page 2

An inscribed dedication "Erected by the Garden Club of America 1932" was meant to appear on one of the undecorated sides at the lower part of the marker; however, only one of the markers—the one located on the east side of Wisconsin Avenue at Friendship Heights—still has its dedication visible (some may not have been inscribed, others may be below ground level, others may have broken off). Similarly, a metal fence comprised of four metal bollards with chains linked between them, originally surrounded the markers. Today, only two of the markers retain these chain fences. Finally, the markers were originally set within planting schemes designed by the Maryland and Virginia Garden Clubs, respectively. Today, only the markers on Georgia Avenue and Chevy Chase Circle are set within (recently) planted beds.

Westmoreland Circle Markers:

The Westmoreland Circle markers are located on either side of the grassy circle, at the inside of its circumference and generally on-axis with Western Avenue (on the west side of Westmoreland Circle the extension of Western Avenue is actually the Dalecarlia Parkway). The western-most marker is located beneath an oak tree and is surrounded by its original chain fence. The marker is in relatively good condition with both the District and Maryland cartouches legible, though both seals are quite weathered and worn down. The edges of the marker have suffered abuse, with major spalling in particular, apparent on the southwest edge of the marker, on its upper half.

The eastern-most marker, located in the open with no tree or chain fence for protection, is more susceptible to out-of-control motorists. The marker is not fully upright, but is slightly tilted, having been hit and re-erected on several occasions. The stone face has been sheared away from this marker at one of its lower corners (this corner is presently located towards the inside of the circle on the southeast side), though the Maryland seal remains in excellent condition and surprisingly unweathered.

8. Statement of Significance

Applicable National Register Criteria

(Mark "x" in one or more boxes for the criteria qualifying the property for National Register listing)

- A** Property is associated with events that have made a significant contribution to the broad pattern of our history.
- B** Property associated with the lives of persons significant in our past.
- C** Property embodies the distinctive characteristics of a type, period, or method of construction or represents the work of a master, or possesses high artistic values, or represents a significant and distinguishable entity whose components lack individual distinction.
- D** Property has yielded, or is likely to yield, information important in prehistory or history.

Criteria Considerations

(Mark "x" in all the boxes that apply)

Property is:

- A** owned by a religious institution or used for religious purposes.
- B** removed from its original location.
- C** a birthplace or grave.
- D** a cemetery.
- E** a reconstructed building, object, or structure.
- F** a commemorative property.
- G** less than 50 years of age or achieved significance within the past 50 years.

Garden Club of America Markers at
Westmoreland Circle

Name of Property

Washington, D.C.

County and State

Section 8 Page 1

Summary Statement of Significance:

The Garden Club of America markers are stone markers that were erected to mark important entrances to the District of Columbia from Maryland and Virginia in 1932 and 1933. Originally planned to be dedicated as part of the 1932 George Washington Bicentennial celebration, the markers were constructed both concurrently with the series of events celebrating the 200th anniversary of Washington’s birth and following the celebration. The markers were designed by local Washington, D.C. architect Edward Donn for the Garden Club of America which sponsored their erection in collaboration with the National Capital Parks and Planning Commission and under the review of the Commission of Fine Arts. Of the original six pairs of markers identified as having been constructed, three pairs and a single marker survive in various degrees of preservation.

The markers are significant both as surviving objects associated with the important George Washington Bicentennial Celebration, a national celebration commemorating the contributions made by the “first true American,” and as landscape objects marking the District-Maryland and District-Virginia line at notable entry points into the city. The ornamentation of the stone markers (i.e the depiction of George Washington) is emblematic of the efforts of the era to arouse nationalistic sympathies and, as such, provides an excellent artistic expression of the time.

The markers are significant under Criterion C and Criterion Consideration F with Art and Landscape Architecture as the Areas of Significance. The Period of Significance for the markers extends from 1932 to 1933, when the first and last of the markers are known to have been dedicated.

+

Resource History and Historic Context:

Westmoreland Circle Markers

The first pair of entry markers was erected on April 24, 1932 on the Virginia side of Key Bridge. Over a year later, in October 1933, another pair of entry markers was dedicated at Chevy Chase Circle, along with the Newlands Memorial Fountain. According to the *Evening Star*, the Chevy Chase markers were the “sixth to be placed by the Garden Club of America at important gateways to the city.” The article notes that the other five pairs of markers were placed at the 16th Street entrance, at Wisconsin Avenue, at Georgia and Alaska avenues, and on the Virginia side of “both the Highway and Key Bridges.” The article states, “It is hoped that the Garden Club of America will similarly mark other entrances to the city as they are developed into

Section 8 Page 2

impressive gateways.”¹ Little is known about exactly when the Westmoreland Circle markers were erected, and there is some speculation that the pair of markers erected on 16th Street were moved to Westmoreland Circle.² In any case, it is known that the Westmoreland Circle markers stood at the Circle by June 1935 when a Westmoreland Hills resident wrote to Charles Moore at the Commission of Fine Arts, stating,

“I notice the nice Boundary stones which have been put on the circle of Massachusetts Avenue Extended. I like them very much, but if you will notice some time, you will see, I think, that they have not been rightly oriented. The Maryland District Line neither goes through the plane of either their surfaces, or through the corners. I think when you or your representative sees them you will see that they need turning so as to mark the boundary properly.”³

A return letter from Moore to the concerned citizen explains that the Westmoreland Circle markers, like those at Chevy Chase Circle, were not meant to mark the actual boundary line, but were simply a notification that one was passing a boundary.

+

¹ “Notables Attend Francis Newlands Fount Dedication,” *The Evening Star*, October 13, 1933, B-1.

² This speculation is simply based on the fact that the 16th Street entry markers are mentioned in press reports, but are no longer extant, while the Westmoreland Circle markers are not mentioned in period newspaper accounts at all.

³ Letter from Anson Phelps Stokes to Mr. Charles Moore, Commission of Fine Arts, dated June 6, 1935 (on file at the Commission of Fine Arts).

Description Summary:

Between April 1932 and October 1933, pairs of stone markers, designed by architect Edward Donn to identify important entrances into the District of Columbia from Maryland and Virginia, were erected at six different locations into the city. The pair of stone markers at Friendship Heights represents two of seven surviving markers (three pairs and one single marker). The surviving pairs of markers are located at Friendship Heights, on either side of Wisconsin Avenue at Western Avenue; at Westmoreland Circle; and at Chevy Chase Circle. The isolated example is found in the median at the center of Georgia Avenue at the District line at Kalmia Road and Alaska Avenue. All of the extant markers have signs of weathering, pollution and other abuse. Most, if not all, have been knocked over at some point by motorists, or removed entirely and re-erected in the same general, but not exact same locations. The missing markers were likely removed and discarded during road widenings and/or construction; however, nothing is known for sure of their fate.

General Description:

The markers are upright, rectangular-shaped, dolmen-like stones constructed of Aquia Creek sandstone. Although the stones originally rose approximately five feet in height, they are now of varying heights depending on whether and how many times they have been knocked over and broken by erratic motorists and re-erected on their broken bases. The markers feature fluted shafts with fluting on-center running vertically the full length of the shaft, and horizontally along the edges, forming a defined edge or border.

On the markers located at the Maryland-District line, the seal of Maryland (the shield of the Calvert Coat of Arms) is located on one side towards the upper part of the stone shaft, with "Maryland" incised in uppercase lettering below the seal. On the opposing side and also at the upper part of the shaft, is a cartouche carving representing the District of Columbia and the commemoration of George Washington. "District of Columbia" is incised in uppercase lettering below the cartouche. The District of Columbia cartouche features a bas-relief depicting George Washington standing upon a pedestal with Lady Justice on the ground next to the pedestal holding a laurel wreath at its front. George Washington is flanked in the background by the dome of the Capitol building and a rising sun. In the foreground, an eagle is perched upon a garland emanating from a central laurel wreath.

The Virginia markers (no longer extant) had a seal of Virginia on one side and the commemorative seal of Washington on the other side.

County and State

Section 7 Page 2

An inscribed dedication “Erected by the Garden Club of America 1932” was meant to appear on one of the undecorated sides at the lower part of the marker; however, only one of the markers—the one located on the east side of Wisconsin Avenue at Friendship Heights—still has its dedication visible (some may not have been inscribed, others may be below ground level, others may have broken off). Similarly, a metal fence comprised of four metal bollards with chains linked between them, originally surrounded the markers. Today, only two of the markers retain these chain fences. Finally, the markers were originally set within planting schemes designed by the Maryland and Virginia Garden Clubs, respectively. Today, only the markers on Georgia Avenue and Chevy Chase Circle are set within (recently) planted beds.

Chevy Chase Circle Markers

The Chevy Chase Circle markers are located well within the inside circumference of the circle and on-line with Western Avenue. The markers are sited in a grassy median between the benches and stone paving that encircle the centrally placed Newlands Fountain and the azalea plantings forming a perimeter to the fountain. The Chevy Chase Circle markers are set so that one has the Maryland seal on the south-facing side and the District seal on the north-facing side, while the other has the Maryland seal on the north-facing side and the District seal on the south-facing side of the marker.

Although the western marker appears to stand at its original 5-foot height, the GCA dedication panel is not visible. It may not exist, or it may be buried below grade. The fluting at the bottom of the shaft is heavily worn and the top of the shaft has a large crack around it where a broken piece was re-attached to the larger shaft.

The eastern marker is the upper-half remnant of the original marker, set upon a concrete base, raising the marker to its full original height. This marker was renovated by Cathedral Stoneworks and re-erected by the Friends of Chevy Chase Circle in 2002. Although the fluting on the shaft is worn and chipped, the south-facing Maryland cartouche is in good condition and remains distinct. The District cartouche is much more worn with even the bas reliefs of George Washington and Lady Liberty completely worn down.

8. Statement of Significance

Applicable National Register Criteria

(Mark "x" in one or more boxes for the criteria qualifying the property for National Register listing)

- A** Property is associated with events that have made a significant contribution to the broad pattern of our history.
- B** Property associated with the lives of persons significant in our past.
- C** Property embodies the distinctive characteristics of a type, period, or method of construction or represents the work of a master, or possesses high artistic values, or represents a significant and distinguishable entity whose components lack individual distinction.
- D** Property has yielded, or is likely to yield, information important in prehistory or history.

Criteria Considerations

(Mark "x" in all the boxes that apply)

Property is:

- A** owned by a religious institution or used for religious purposes.
- B** removed from its original location.
- C** a birthplace or grave.
- D** a cemetery.
- E** a reconstructed building, object, or structure.
- F** a commemorative property.
- G** less than 50 years of age or achieved significance within the past 50 years.

Narrative Statement of Significance

(Explain the significance of the property on one or more continuation sheets)

Summary Statement of Significance:

The Garden Club of America markers are stone markers that were erected to mark important entrances to the District of Columbia from Maryland and Virginia in 1932 and 1933. Originally planned to be dedicated as part of the 1932 George Washington Bicentennial celebration, the markers were constructed both concurrently with the series of events celebrating the 200th anniversary of Washington’s birth and following the celebration. The markers were designed by local Washington, D.C. architect Edward Donn for the Garden Club of America which sponsored their erection in collaboration with the National Capital Parks and Planning Commission and under the review of the Commission of Fine Arts. Of the original six pairs of markers identified as having been constructed, three pairs and a single marker survive in various degrees of preservation.

The markers are significant both as surviving objects associated with the important George Washington Bicentennial Celebration, a national celebration commemorating the contributions made by the “first true American,” and as landscape objects marking the District-Maryland and District-Virginia line at notable entry points into the city. The ornamentation of the stone markers (i.e the depiction of George Washington) is emblematic of the efforts of the era to arouse nationalistic sympathies and, as such, provides an excellent artistic expression of the time.

The markers are significant under Criterion C and Criterion Consideration F with Art and Landscape Architecture as the Areas of Significance. The Period of Significance for the markers extends from 1932 to 1933, when the first and last of the markers are known to have been dedicated.

+

Resource History and Historic Context:

Chevy Chase Circle Markers

The first pair of entry markers was erected on April 24, 1932 on the Virginia side of Key Bridge. Over a year later, in October 1933, the pair of entry markers was dedicated at Chevy Chase Circle, along with the Newlands Memorial Fountain. According to the *Evening Star*, the Chevy Chase markers were the “sixth to be placed by the Garden Club of America at important gateways to the city.” The article notes that the other five pairs of markers were placed at the 16th Street entrance, at Wisconsin Avenue, at Georgia and Alaska avenues, and on the Virginia side of “both the Highway and Key Bridges.”

Section 8 Page 2

Like the entry markers, the Chevy Chase Circle Fountain was designed by Edward W. Donn, architect. The fountain was dedicated to Francis Newlands, a Senator from Nevada and founder of the suburb of Chevy Chase, and donated in his memory by his “family, friends and admirers.” Although much greater press was given to the fountain itself at the time of its dedication, appreciation was also expressed for the entry markers, “placed by the Garden Club of America” and for the shrubbery “provided by the Maryland garden clubs.”¹

Over the years, one of the two markers at Chevy Chase Circle disappeared while the other had been relocated to a median strip on the District side of Connecticut Avenue. In the year 2000, after a motorist knocked the marker down, the National Park Service removed this remaining marker, placing it in storage in a Park shed in Rock Creek Park. Shortly thereafter, local residents began a campaign to get the Circle’s marker back, and in so doing also learned of the whereabouts of the missing marker. The residents encouraged the Park Service to get the marker back out of private hands, a task that was eventually accomplished.²

In 2002, the Friends of Chevy Chase Circle hired Cathedral Stoneworks to restore both the lost marker and the broken marker and reinstall them in their original locations inside Chevy Chase Circle. The masons and sculptors re-attached a broken piece of the lost marker to the larger stone shaft and restored the D.C. seal, using an “appropriate” material. For the broken marker, they built a new base using Pennsylvania limestone upon which they then erected the surviving Aquia Creek marker, connecting it to the new base by a one-foot brass pin. The markers were re-erected in the Circle in September of 2003. They were placed to either side of the fountain on the east and west and in line with Western Avenue.

Section 7 Page 1

Description Summary:

Between April 1932 and October 1933, pairs of stone markers, designed by architect Edward Donn to identify important entrances into the District of Columbia from Maryland and Virginia, were erected at six different locations into the city. The pair of stone markers at Friendship Heights represents two of seven surviving markers (three pairs and one single marker). The surviving pairs of markers are located at Friendship Heights, on either side of Wisconsin Avenue at Western Avenue; at Westmoreland Circle; and at Chevy Chase Circle. The isolated example is found in the median at the center of Georgia Avenue at the District line at Kalmia Road and Alaska Avenue. All of the extant markers have signs of weathering, pollution and other abuse. Most, if not all, have been knocked over at some point by motorists, or removed entirely and re-erected in the same general, but not exact same locations. The missing markers were likely removed and discarded during road widenings and/or construction; however, nothing is known for sure of their fate.

General Description:

The markers are upright, rectangular-shaped, dolmen-like stones constructed of Aquia Creek sandstone. Although the stones originally rose approximately five feet in height, they are now of varying heights depending on whether and how many times they have been knocked over and broken by erratic motorists and re-erected on their broken bases. The markers feature fluted shafts with fluting on-center running vertically the full length of the shaft, and horizontally along the edges, forming a defined edge or border.

On the markers located at the Maryland-District line, the seal of Maryland (the shield of the Calvert Coat of Arms) is located on one side towards the upper part of the stone shaft, with "Maryland" incised in uppercase lettering below the seal. On the opposing side and also at the upper part of the shaft, is a cartouche carving representing the District of Columbia and the commemoration of George Washington. "District of Columbia" is incised in uppercase lettering below the cartouche. The District of Columbia cartouche features a bas-relief depicting George Washington standing upon a pedestal with Lady Justice on the ground next to the pedestal holding a laurel wreath at its front. George Washington is flanked in the background by the dome of the Capitol building and a rising sun. In the foreground, an eagle is perched upon a garland emanating from a central laurel wreath.

The Virginia markers (no longer extant) had a seal of Virginia on one side and the commemorative seal of Washington on the other side.

Friendship Heights

Name of Property

Washington, D.C.

County and State

Section 7 Page 2

An inscribed dedication “Erected by the Garden Club of America 1932” was meant to appear on one of the undecorated sides at the lower part of the marker; however, only one of the markers—the one located on the east side of Wisconsin Avenue at Friendship Heights—still has its dedication visible (some may not have been inscribed, others may be below ground level, others may have broken off). Similarly, a metal fence comprised of four metal bollards with chains linked between them, originally surrounded the markers. Today, only two of the markers retain these chain fences. Finally, the markers were originally set within planting schemes designed by the Maryland and Virginia Garden Clubs, respectively. Today, only the markers on Georgia Avenue and Chevy Chase Circle are set within (recently) planted beds.

Friendship Heights Markers:

The Friendship Heights markers are located on either side of Wisconsin Avenue, on the north side of Western Avenue. Here, the markers emerge directly out of the concrete sidewalk and may have been re-erected during the 1977 construction of METRO when they were “discovered” by METRO contractors. The western marker is located just north of the light standard at the crosswalk and stands a mere 2-1/2 or 3-feet tall. The District cartouche, on the south side of the marker and facing the District of Columbia, is heavily worn. George Washington and Lady Liberty are still distinct, although the background carvings are barely visible. In addition, the fluting is chipped and worn and cracks are apparent where the marker has been broken and likely re-mounted. This marker has been repeatedly hit by motorists and re-erected on its broken base, thus explaining its reduced height.

The eastern marker is located on the brick sidewalk, between a traffic light and street light standard. This marker is in remarkable shape and is the most intact of all of the surviving markers. The marker stands its original 5 feet in height, has clean fluting lines on the upper 2/3 of the shaft and intact cartouches with that of the District of Columbia on the south side being particularly clear and distinct. The dedication panel bearing the inscription “Erected by the Garden Club of America 1932” also remains intact at the lower part of the western side of the shaft facing Wisconsin Avenue. The bottom third of the shaft is worn and chipped, especially on the southern side facing the on-coming northbound traffic.

8. Statement of Significance

Applicable National Register Criteria

(Mark "x" in one or more boxes for the criteria qualifying the property for National Register listing)

- A** Property is associated with events that have made a significant contribution to the broad pattern of our history.
- B** Property associated with the lives of persons significant in our past.
- C** Property embodies the distinctive characteristics of a type, period, or method of construction or represents the work of a master, or possesses high artistic values, or represents a significant and distinguishable entity whose components lack individual distinction.
- D** Property has yielded, or is likely to yield, information important in prehistory or history.

Criteria Considerations

(Mark "x" in all the boxes that apply)

Property is:

- A** owned by a religious institution or used for religious purposes.
- B** removed from its original location.
- C** a birthplace or grave.
- D** a cemetery.
- E** a reconstructed building, object, or structure.
- F** a commemorative property.
- G** less than 50 years of age or achieved significance within the past 50 years.

Narrative Statement of Significance

(Explain the significance of the property on one or more continuation sheets)
